Summary: No project combined radical innovation and political furore quite like the F-111 program. It was intended as the world's biggest, most expensive defence procurement plan when it began in 1962. Summary: An improved version of the Allison V-1710 engine gave rise to the Curtiss H-87, which began life in 1941 as the P-40D and featured a completely redesigned fuselage. The shorter and deeper nose of the new fighter gave it a decidedly snub-nosed appearance compared to the earlier P-40 models. Summary: During the early years of the Cold War, the most effective way to gather strategic intelligence about the Soviet Union and its allies was manned overflight. Lockheed's U-2 was spectacularly successful in this role. Much to the concern of President Eisenhower, its shape meant that it could be tracked on Russian radars. Given the highly sensitive nature of such flights, the President insisted that every effort should be made to reduce to zero the U-2's radar cross section (RCS), thereby m...

Summary: Francis Scott Key's Star Spangled Banner, inspired by Fort McHenry's defense after the burning of Washington, DC, during the War of 1812, reminds Americans of a time when the United States faced a very real foreign invasion.

Arising out of a series of bitter commercial and naval disputes, and having as much to do with perceived slights to national pride as any pressing cause, the War of 1812 was never the most popular of conflicts on both sides of the Atlantic. Boggled down by their inv...

Summary: On 26 August 1071 a large Byzantine army under Emperor Romanus IV met the Saljuq Turk forces of Sultan Alp Arslan near the town of Manzikert to the far east of the Byzantine Empire. The battle ended in a decisive defeat for the Byzantine forces, with the wings of the army routing following withering Turkish arrow fire, and the centre overwhelmed, with the Byzantine emperor captured and much of his fabled Varangian guard killed. This battle is justifiably regarded as a turning point in M...

Summary: In the seventh year of the Second Peloponnesian or 'Archidamian' War the Athenians occupied the promontory of Pylos on the west coast of the Peloponnese as a counterstroke to Sparta's repeated invasions of Attica. Summary: The German blitzkrieg conquest of France and the Low Countries (via the Ardennes, Arras, and Dunkirk) in May and June of 1940 has never been surpassed in the history of warfare in that no clash between such great and apparently equal forces has been decided so swiftly and conclusively. Summary: From Coral Sea to Midway to Guadalcanal and Santa Cruz, these fighters battled for air supremacy over the Pacific in World War II.

The Grumman F4F Wildcat and the Mitsubishi A6M Zero-sen were contemporaries, although designed to very different requirements. Ruggedly built so as to survive the rigors of carrier operations, the Wildcat was the best carrier fighter the US Navy had available when the USA entered World War II, and it remained the principal fighter for the US Navy and the US...

Summary: Although tanks like the Sherman and Panther captured the headlines, the Allies' M10 tank destroyer and the Germans' Sturmgeschutz (StuG) III were the unsung workhorses of the northwest European battlefields of 1944-45. While their mission was not principally fighting one another, their widespread use ensured their frequent encounters, from the Normandy bocage to the rubble-strewn streets of Aachen.

Fast-moving and formidably armed, the battlecruisers of the British and German navies first encountered one another in 1915 at Dogger Bank and in the following year clashed near Jutland in the biggest battleship action of all time. Summary: At the start of World War I a new and potent threat to Britain's naval supremacy took shape in the form of the Kaiser's Imperial German submarines, thanks to their recently acquired ability to submerge and stalk their adversaries. Summary: In the late 1950s, as America prepared for the Civil War centennial, two very old men lay dying. Albert Woolson, 109 years old, slipped in and out of a coma at a Duluth, Minnesota, hospital, his memories as a Yankee drummer boy slowly dimming. Walter Williams, at 117 blind and deaf and bedridden in his daughter's home in Houston, Texas, no longer could tell of his time as a Confederate forage master. The last of the Blue and the Gray were drifting away; an era was ending.

A leading art theorist analyses the global style in art and architecture

Summary: Hal Foster, author of the acclaimed *Design and Crime*, argues that a fusion of architecture and art is a defining feature of contemporary culture. He delineates a "global style" of architecture, as practiced by Norman Foster, Richard Rogers and Renzo Piano, analogous to the "international style" of Le Corbusier, Gropius and Mies. More than any art, today's global style conveys the look of modernity, both its dreams and its delusions. In these ways Foster demonstrates that the "artarchite..."

Lifts the lid on an artistic ferment which has defied every known law of the music business

Summary: This brilliant biography of the cult guitar player will likely cause you to abandon everything you thought you knew about jazz improvisation, post-punk and the avant-garde. Derek Bailey was at the top of his profession as a dance band and recordsession guitarist when, in the early 1960s, he began playing an uncompromisingly abstract form of music. Today his anti-idiom of "Free Improvisation" has become the lingua franca of the "avant" scene, with Pat Metheny, John Zorn, David Sylvian an...

A major reinterpretation of Gandhi's life, politics, religion and nation

Summary: Throughout his long and turbulent career as an Indian leader, first in South Africa and then in India, Gandhi sought to fulfill his religious aspirations through politics, and to reconcile politics with his private religious discipline. The Gandhi revealed here is not the secular saint of popular renown, but a difficult and self-obsessed man driven by a sense of unique personal destiny.

Penetrating and provocative, Tidrick draws on material previously ignored by Gandhi's biographers an...

A shocking exposé of how modern-day corporations and governments are raiding the Third World

Summary: To the governments and corporations that are currently buying up vast tracts of the Third World, it is called "land leasing." To its critics this new era of colonization is nothing more than "land grabbing." "Shake your chains to earth like dew," it implores. "Ye are many-they are few."

How slavery shaped the market economy and abolitionists gave us our ideals

Summary: For over three centuries, slavery in the Americas fuelled the growth of capitalism. The stirrings of a revolutionary age in the late eighteenth century challenged this "peculiar institution" and set the scene for great acts of emancipation in Haiti in 1804, in the United States in the 1860s, and Brazil in the 1880s. Blackburn argues that the anti-slavery movement helped forge the political and social ideals we live by today.

In this sense theatre is, of all the arts, the one strictly homologous to politics: both theatre and politics depend on a limited set of texts or statements, collectively enacted by a group of actors or militants, which put a limit on the excessive power of the state. This explains why the history of theatre has always been inseparable from a history of state repression and c...

Summary: Paul Robeson was one of the most famous people in the world; to his enemies he was also one of the most dangerous. From the 1930s to the 1960s, the African American singer was the voice of the people, both on stage and as a political activist who refused to be silenced as he fought for the rights of the oppressed. His message of peace, equality and justice was understood as much on the streets of Manchester, Moscow, Johannesburg and Bombay as it was in Harlem and Washington, DC.
